

<p style="text-align: center;">TYPE OF FEEDERS</p>		<p style="text-align: center;">RECOMMENDED Des Moines Feed Co. Products</p>	<p style="text-align: center;">ATTRACTS</p>
<p>Squirrel Feeder</p> <p>This feeder holds peanuts, corn and large seed perfect for squirrels! ... Simply place the Squirrel feeder in a location away from your bird feeders. Fill it with their favorite food: whole peanuts, sunflower seed or Parkview® Bushy Tail Treat and watch the squirrels have a ball!</p>		<p>Shelled Peanuts, Ear Corn, Parkview® Bushy Tail Treat</p>	<p>Squirrels, Chipmunks, Raccoons, Rabbits</p>
<p>Tube (Large Holes)</p> <p>Tubular feeders are made to be versatile and convenient. Some deluxe tube feeders will come with interchangeable fittings that will give you flexibility with different food. Keep in mind what kinds of birds you would like to attract when purchasing a tube feeder. Tube feeders are usually very easy to maintain. "Snap apart" assembly makes cleaning and refilling easy tasks. Many tube feeders provide a good amount of space between feeding portals to help reduce competition, but also consider the size of the perches. Larger birds cannot land on short perches.</p>		<p>Peanuts, Peanut Hearts, Sunflower Seed, Sunflower Hearts, Safflower Seed, Des Moines Attraction Mix, Des Moines Rich N Tweet, Des Moines Fruit & Nut, Des Moines Regal Mix</p>	<p>Tufted Titmice, Chickadees, Goldfinches, House Finches, Purple Finches, Jays, Grosbeaks, Nuthatches, Redpolls, Pine Siskins</p>
<p>Tube (Small Holes)</p> <p>Nyjer seed is a favorite of finches and a wide variety of birds. Nyjer Tube Feeders featuring heavy die-cast metal caps, bases and a clear UV stabilized polycarbonate tube combine to make these feeders an investment that lasts a lifetime. You will appreciate the convenience of easily removing the easy clean base without the need of tools even with a seed tray attached. A built-in seed deflector in the base allows birds to remove every last seed. The metal cap lifts and pivots easily for filling and cleaning.</p>		<p>Nyjer Seed, Fine Sunflower Hearts, Parkview® Outdoor Finch, Des Moines Nyjer & Hearts</p>	<p>Goldfinches, House Finches, Purple Finches, Nuthatches, Chickadees, Pine Siskins</p>
<p>Squirrel Buster™</p> <p>Over 3 million happy clients (and well-fed birds) confirm that the patented Squirrel Buster™ system is truly squirrel proof! Openings in the outside section of the feeder (shroud) align with seed ports, providing birds access to the seed. When a squirrel climbs onto the feeder, its weight automatically forces the shroud down, closing the seed ports. Squirrels are foiled, and not harmed in any way.</p>		<p>Des Moines Regal Mix, Des Moines Attraction Mix, Des Moines Fruit & Nut Mix, Des Moines Standard Mix, Des Moines Classic Mix, Des Moines Deluxe Mix</p>	<p>Goldfinches, House Finches, Purple Finches, Swallows, Kinglets, Warblers, White Throated Sparrows</p>
<p>Platform (Tray)</p> <p>These tray-like feeders allow you to combine a multitude of seeds, nuts and fruits that attract a variety of different birds. A platform feeder should have a large feeding area and a 1-inch rim that prevents your feed from spilling. Because of its design, cardinals and woodpeckers will use this feeder, as it accommodates larger birds unable to eat from a tube feeder.</p>		<p>Black Oil Sunflower Seed, Safflower Seed, Shelled Peanuts, Parkview® Dove Mix, Cardinal Brand® Wild Bird Feed, Des Moines Rich & Tweet, Des Moines Fruit & Nut, Des Moines Classic Mix, Des Moines Standard Mix, Des Moines Woodpecker Mix, Des Moines Deluxe Blend, Des Moines Regal Mix</p>	<p>Cardinals, songbirds, Jays, Tufted Titmice, Goldfinches, House Finches, Purple Finches, Woodpeckers</p>
<p>Wire Mesh Feeder</p>		<p>Shelled Peanuts, Tree Nuts, Des Moines Woodpecker Mix</p>	<p>Woodpeckers, Nuthatches,</p>

Mesh feeders are used for dispensing larger seeds such as black oil sunflower seeds. Small grain such as millet, will fall through it. These feeders are designed to resist squirrel damage and help birds avoid avian diseases. Squirrels can use these feeders, but will be frustrated that they can only pick one seed at a time. Mesh feeders are meant to attract birds that cling because other birds cannot perch on them, which will keep starlings and other larger birds away.

Chickadees, Tufted Titmice
